

SIT Working Flow

Prepare Test Data

Confirm the GL/IE Account Mapping Status(Fusion & Hub IT)

Prepare batch info for Fusion Team(Discuss with Hub Engineer stop the file upload,then get the Sequence Number)

Sent Prepared info to Fusion Team(Sequence Number/File ID)

Get the Batch File sent to Hub status from Fusion Team

Check with Hub Engineer whether the file posted successfully

Sent Batch file to REM Run Batch or we use existing batch file(need discuss with REM Team member)

Get the status response

Hub SIT do Smoke Test with the Batched Data

If no data issue then start SIT testing

If has data issue then notice all team member then track the issue with related team

SIT testing

Run Case and Raise Defect
